

Millepede Cable Rings™

Bundling cables and wires has been a problem since the first electrical and telephone lines were laid. You now have no need to be concerned with this very necessary operation. Millepede Cable Rings™ will increase your company's productivity by reducing installation time, decreasing waste and eliminating many safety hazards without disrupting the flow of energy.

The adjustable and reusable Millepede Cable Rings™ come in 4 sizes, (1/2 inch to 2 inches), as well as specialized versions for channel struts and distribution racks.

The Millepede Cable Rings™ are adaptable to just about any cabling situation, be it installing a new information system, wiring a building or even laying cable for a rock concert!

Millepede Cable Rings™, made of lightweight nylon, enables you to wrap your cables 3-5 times faster than with traditional tie wraps. Millepede Cable Rings™ can be applied with one hand and is reusable. Productivity is enhanced when you need to add another cable to the bundle as Millepede Cable Rings™ are easily unclashed without any special tools and there are no sharp edges that can cause injury.

Millepede Cable Rings™ are designed to safeguard the flow of current in computer cables, telephone lines, fiber optics, electrical wires and industrial usage from automobiles to aircraft.
