

Mille-Rod™

PUSH-PULL RODS

Standard Range

This high quality affordable range is the ideal entry system for the amateur and professional user alike. Mille-Rod Standard range enables the installation of wire and cable over long runs and through hard to access voids and cavities. Made from high quality 4mm (0.15 inch) GRP, these rods with their specially engineered joints are individually tested to 80 kg (176 lbs). The ultra short joints ensure maximum bending when the rods are connected by reducing the flat spots at each thread point. Each joint is also engineered to ensure a very low profile to reduce snagging risk. The use of Mille-Rod allows cables to be installed with minimum disruption, avoiding time-consuming and costly re-decoration.

The essential addition to every tool set!

- High performance GRP (Glass Reinforced Plastic) Rods – Each tested to 80 Kg (176 lbs)
- Ultra short joints for maximum bend
- Low profile threads for reduced snag risk.
- Flexible range of attachments to accommodate almost any requirement.
- Extendable by adding additional sets.

Mille-Rod Standard (Full Size) - 6.1 metre (20 ft)

Code: MPMR-6-1-CQFS EAN Code: 5060029110369

Contents:
